BRAND GUIDELINES · V1.0

Paraya.

Shelter for the outliers. Paraya is a media production studio built on one conviction: the outsider's view is the truest one. These guidelines set

down how that conviction should look, sound, and behave: in a deck, on a set, on a hoodie, or on the tech portal to come.

01

Origin & meaning

The name is the brand strategy. Everything else in this document is downstream of it.

Paraya means outsider: someone who stands apart, who sees differently. The word carries roots that run deeper than a tagline: echoes of the Banjara, India's nomadic drumming communities, and of the Hindi sense of being "outside the family." It is not a wound. It is a vantage point.

"Being Paraya is not about being excluded. It is about choosing authenticity over conformity."

PARAYA <i>The outsider</i> Stands apart. Sees differently. Refuses to blend in. The starting condition: the raw material every client, creator and crew member brings into the studio.	PAYA (पाया) <i>The one who found</i> To find. To discover. To arrive. Paraya's work is the mechanism that moves someone from the left column to the right, from unseen to understood.
---	--

The wordmark carries the same idea one layer deeper: set as "Pa**RT**aya," it hides the word **ART** inside Paraya, capitalized, unmissable once you see it. On the live site, clicking the "Paraya" portion of the header also routes to a separate Paya destination (the tech/talent marketplace) with an accompanying

color shift that signals the change of context. Treat both as permanent pieces of brand behavior, not one-off details.

02 Philosophy

Founding line, stated in full: **"Courage, originality, honest expression."** Every value below is that sentence, expanded.

FOUNDATION

Think before we create

No content for content's sake. Every project opens with listening: to story, audience, purpose.

CORE

Storytelling first

Narratives that connect emotionally and outlast the scroll, not just visuals.

RELATIONSHIP

Partners, not vendors

We work as an extension of the client's team. Their goals become our goals.

PROCESS

Craft over templates

No copy-paste formulas. Every frame is custom-built for the brand it serves.

IMPACT

Creativity with results

Aesthetics matter. Visibility, engagement and growth matter more.

IDENTITY

Rooted in authenticity

Individuality is never diluted to fit a trend. Stand out by being real.

DELIVERY

End-to-end execution

Concept, camera, campaign: one team carries the full journey.

COMMUNITY

A shelter, in practice

Every spend also reinvests in new Indian filmmakers. One brief, two outcomes.

03 Voice & tone

Introspective and poetic, but never precious. Paraya writes like it's talking to one person, not a market segment.

Introspective

Direct

Cinematic

Unhurried

Warm, not sentimental

Confident without volume

DO

- ✓ Write short declarative sentences, then let one longer one breathe.
- ✓ Use "we" and speak to "you": the client is a partner, addressed directly.
- ✓ Let a sentence fragment land on its own. Like this.
- ✓ Ground abstract values in a concrete action: "no copy-paste formulas."

DON'T

- ✗ Reach for agency jargon: "synergy," "content ecosystem," "value-add."
- ✗ Oversell with superlatives stacked on superlatives.
- ✗ Flatten "outsider" into generic quirky-brand irreverence.
- ✗ Let poetic language replace a concrete claim about the work.

04 The six verticals

Paraya is no longer just a production house. As of the August 2026 rebrand, the studio operates across six lines. The guidelines below apply to all of them equally.

01 CSR story sponsorship

Brand-funded documentary work that reinvests in independent Indian filmmakers, the studio's founding "one spend, two outcomes" model.

02 Long-term Prime / Netflix projects

Extended-format development for streaming platforms: Paraya's move from single campaigns into sustained IP.

03 Brand & marketing work

The core commercial engine: content, campaigns, corporate film and podcast production for ongoing client relationships.

04 Merch

A seven-piece made-to-order line (bomber, baby tee, vest, muscle tee, long shirt, sari-jeans) launching mid-October, ~3 day turnaround.

05 Events

Music festivals, hospitality and F&B coverage, and live experiences captured in Paraya's documentary style.

06 Paya, the tech portal

A copyrighted marketplace connecting talent, crew, creations, locations and gear across media production. The "found" half of the brand, built as a product.

05 Color

Two colors, locked by Ritu's own spec sheet. Slate is the outsider's distance; terracotta is the warmth of being found. Everything else below is a working extension, not canon.

Outsider Slate
#2E4052 · locked

Primary ink. The wordmark, body text, dark surfaces: the studio's default voice.

Found Terracotta
#B45F41 · locked

The one warm note: the ring-and-tassel mark, the tagline, CTAs, the moment of discovery.

Extended palette: pulled from the live build, useful for backgrounds and hierarchy, but not part of the locked sheet. Confirm with Ritu before treating any of these as permanent.

Shelter White
#FFFFFF

Primary ground: the blank space Paraya offers every outsider.

Cinema Charcoal
#1F2A2E

Darker than slate: near-black surfaces and film-still overlays.

Spark Gold
#F6B000

Seen once on-site, on an eyebrow label.
Provisional: treat as a possible third accent, not a given.

Quiet Grey
#F7F7F7

Section breaks and cards: a rest between white and charcoal.

Ratio guide: roughly 65% white/grey, 25% slate or charcoal, 10% terracotta. Terracotta should never anchor a large surface. It marks a moment, not a mood.

06 Typography

EB Garamond Extra Bold is the locked brand typeface, straight from Ritu's spec sheet. The wordmark itself is hand-lettered, not set type. EB Garamond is what carries the voice everywhere the logo can't reach: headlines, decks, packaging, the tagline arc.

EB Garamond, Extra Bold

Locked: display headlines, pull quotes, the tagline treatment

Shelter for the outliers

Use at large display sizes Extra Bold only: it's a display cut, not a text weight

EB Garamond, Regular / Italic

Working extension: long-form body copy, captions, the tagline arc's italic

Every story deserves a place to belong.

Not in the locked sheet: Ritu specified Extra Bold only

Recommended so the family reads at body sizes; confirm before adopting

The live parayaproductions.com build currently runs on Manrope, a geometric sans, for all UI text. That's a placeholder from the temporary site, not the brand spec; flag it for replacement when the Paraya.com rebuild starts. Where a UI needs a workhorse sans EB Garamond can't provide (buttons, form fields, dense data), pair it with a plain, quiet sans rather than reaching for Manrope by default. Confirm the choice with Ritu rather than carrying the placeholder forward by habit.

07 Logo & mark

Hand-lettered, not set in type: that's the point. A studio built on refusing templates doesn't logo itself in a template font.

Primary lockup, full color, on white

Reversed, white, for dark or photographic grounds

Secondary lockup, no tagline, for tight spaces

THE WORDPLAY

THE ORNAMENT

Set as "Pa**RT**aya," the capitalized letters spell **ART** inside the outsider's name. The logotype does the same work as the etymology in Section 01, one layer down.

LOCKUP CHOICE

Use the primary lockup (tagline + ornament) wherever there's room to breathe: title cards, decks, print. Drop to the secondary, tagline-free lockup for favicons, merch tags, and anywhere under ~120px wide.

The ring-and-tassel mark hanging off the wordmark and the monogram (right) nods to Banjara jewelry, the nomadic community the name partly draws from. It is a fixed part of the mark, not a seasonal decoration.

NEVER

Never re-color the wordmark outside slate/terracotta/white/black, stretch it off its native ratio, redraw the ART emphasis in a different weight, or place a color lockup over imagery without a scrim.

The monogram, रा (*Ra*), the first syllable of Paraya in Devanagari, stands alone for anywhere the full wordmark won't fit: app icons, social avatars, a stitched merch tag.

Minimum size: keep the monogram no smaller than ~32px on screen or 10mm in print. Below that, the tassel detail disappears and it reads as a blob. Clear space around any lockup: no less than the height of the wordmark's "T" crossbar on all sides.

08 Imagery

Documentary first. Every frame should look caught, not staged, even when it's lit like a film.

Light

Low-key, cinematic lighting with real shadow. Avoid flat, evenly-lit "content" lighting; Paraya frames like a film still, not a feed grid.

Subject

Real people over models where possible. Faces mid-thought, not mid-pose. The astronaut portrait on the homepage sets the bar: composed, but unguarded.

Emotion

Raw over polished. A shot earns its place by carrying feeling. Reference: *The Outsiders*, the studio's flagship documentary series.

09 Applications on deck

What this identity needs to hold up under, in the next two quarters.

MID-OCT 2026

Merch launch

Seven made-to-order pieces. Palette and wordmark rules apply directly to garment tagging and packaging.

LATE NOV 2026

Teaser film

Site teaser, funding-dependent. First moving-image test of the imagery direction in Section 08.

ONGOING

Paraya.com rebuild

New site drops the "Productions" suffix, moves to Paraya.com, and becomes the landing space for consultations across all six verticals.

ONGOING

Paya portal

Product UI will need its own applied color-shift treatment per the logo interaction spec in Section 07.

10 Contact & ownership

This is a working draft, built from the live site and the Aug 28 kickoff notes, not a final asset library.
